SWAIN NELSON & SONS COMPANY
Nurserymen and Landscape Gardeners
140 DEARBORN STREET
CHICAGO

A Foreword

IF YOU contemplate improving your grounds or beautifying your lawn you will find that we have among our trees and shrubs the varieties that you need in the sizes that will please you best.

**Your
Needs
Anticipated**

¶ The plants listed in this catalogue are all grown in our own nurseries at Glen View, Cook County, Illinois, and are proved to be perfectly hardy and vigorous.

¶ We wish to emphasize the fact that we offer plants of exceptionally large size especially adapted for producing immediate effects in landscape planting.

**Immediate
Effects**

¶ The use of large plants appears to be expensive, but in reality it is not so, for although large plants cost more than small ones, fewer are needed to cover the same area, and hence in the end there is an actual saving of expense.

**Real
Economy**

¶ If desired we will plant the trees and shrubs ordered from us for a reasonable additional charge, arranging them artistically and replacing those that fail to grow.

**We will do
Your
Planting**

¶ The prices quoted in the following pages are F. O. B. cars at our nurseries. No charge will be made for packing and boxing, except the actual cost of the material used.

Certificate from the State Entomologist

July 17, 1903

This is to certify that the growing nursery stock and premises of the Swain Nelson and Sons Company, situated at Glen View Station, Chicago, Illinois, have been inspected by Mr. E. M. Wright, a duly appointed inspector of this office, according to the provisions of an "*Act to prevent the introduction and spread in Illinois of the San Jose scale and other dangerous insects and contagious diseases of fruits*," approved and in force April 11, 1899, and that no indications have been found of the presence of the San Jose scale or other dangerous insect or plant disease.

This certificate applies only to the condition of this nursery for the period ending June 1, 1904.

S. A. FORBES

State Entomologist

T R E E S

Acer dasycarpum. SILVER MAPLE.

The most rapid-growing of the Maples. It is of great value where immediate shade is required. The foliage is light green.

spicatum. MOUNTAIN MAPLE.

A low-growing tree with broad rough leaves and showy clusters of seed-vessels. It thrives well in shady situations.

5 feet transplanted . . .	1.75	10.00	
4 " " . . .	1.00	6.00	
3 " "75	5.00	

GLEN VIEW NURSERIES

7

	Each	Per 10	Per 100
<i>Æsculus Hippocastanum.</i> HORSE CHESTNUT.			
A well-known tree, handsome in foliage and flower. It is one of the first to expand its leaves in the spring.			
3 inch diam. transplanted . . .	4.50	42.50	375.00
2½ " " " . . .	3.00	27.50	225.00
2 " " " . . .	2.25	20.00	150.00

Ailanthus glandulosa. TREE OF HEAVEN.

A very useful tree for tropical effects because of its immense leaves. It is very fast-growing and does well even in poor soil.

8 feet transplanted60	5.00	40.00
---------------------------	-----	------	-------

Alnus glutinosa. EUROPEAN ALDER.

A rapid-growing moisture-loving tree, bearing interesting pendent catkins in the spring.

3 inch diam. transplanted . . .	3.00	25.00	225.00
2½ " " " . . .	2.25	20.00	150.00
2 " " " . . .	1.75	15.00	100.00

var. imperialis laciniata.

CUT-LEAVED ALDER.

A very graceful tree with deeply cut leaves.

6 feet transplanted . . .	1.50	12.50	
5 " " . . .	1.00	8.50	

Aralia. See Shrubs.*Betula alba pendula.*

CUT-LEAVED WEEPING BIRCH.

A very popular tree of elegant form with deeply toothed leaves, drooping branches and white bark.

10 feet transplanted . . .	2.50	22.50	
8 " " . . .	2.00	17.50	
6 " " . . .	1.50	12.00	

var. atropurpurea.

A tree similar to the above, but with purple foliage.

8 feet transplanted . . .	2.00	17.50	
6 " " . . .	1.50	12.50	

	Each	Per 10	Per 100
<i>Betula lenta.</i> SWEET or BLACK BIRCH.			
A rapid-growing tree with broad leaves and dark brown spicy bark.			
4 inch diam. transplanted . .	7.00	60.00	525.00
3½ " " " . .	5.00	40.00	375.00
3 " " " . .	3.00	25.00	225.00

papyrifera. PAPER or CANOE BIRCH.

One of the finest trees of the genus, with large leaves and beautiful white bark.

3 inch diam. transplanted . .	2.00	15.00	125.00
2½ " " " . .	1.50	9.00	75.00
2 " " " . .	1.00	6.00	45.00

Catalpa Bungei.

A tree with a rounded top of dark green foliage grafted on a standard 8 to 10 feet high. It is useful for planting in formal gardens.

3 inch diam. transplanted . .	5.00		
-------------------------------	------	--	--

Kämpferi. JAPANESE CATALPA.

A variety similar to *Catalpa speciosa*, but smaller and two weeks later in blooming. The long seed-pods remain on the tree through the winter, imparting to it a picturesque appearance.

3 inch diam. transplanted . .	2.50	20.00	
2½ " " " . .	1.75	15.00	
2 " " " . .	1.25	10.00	75.00

speciosa. NATIVE CATALPA.

A rapid-growing native tree with large leaves and panicles of loose trumpet-shaped flowers which are white spotted with purple.

4 inch diam. transplanted . .	3.50	30.00	
3½ " " " . .	2.75	22.50	
3 " " " . .	2.00	15.00	125.00
2½ " " " . .	1.50	9.00	75.00
2 " " " . .	1.00	6.00	45.00

Celtis occidentalis. HACKBERRY.

The foliage of this tree is similar to that of the Elm, but the leaves are thinner. The bark is gray spotted with white.

Celtis occidentalis (continued).

	Each	Per 10	Per 100
10 feet transplanted . . .	1.50	10.00	
8 " " . . .	1.00	9.00	
6 " "75	6.00	

Cerasus. See *Prunus*.

Cercidiphyllum Japonicum. KATSURA.

A very decorative tree of Japanese origin. The leaves are heart-shaped and have a rosy tint in early spring. The bark is red and smooth.

8 feet transplanted . . .	2.25		
6 " " . . .	1.75	15.00	

Cercis Canadensis.

JUDAS TREE or RED BUD.

The foliage is a very rich green and the new shoots have a soft reddish tinge. Before the leaves appear in spring the tree bears a cloud of pink blossoms.

6 feet transplanted . . .	2.50	17.50	
5 " " . . .	1.75	10.00	60.00
4 " " . . .	1.00	6.00	40.00

Crataegus coccinea. SCARLET THORN.

The earliest Thorn to bloom. The white flowers are followed by large scarlet fruit. The thorns are all very valuable in landscape planting.

6 feet transplanted . . .	2.50	17.50	
5 " " . . .	1.75	10.00	60.00
4 " " . . .	1.00	6.00	40.00
3 " "75	5.00	35.00

Crus-galli. COCKSPUR THORN.

The leaves of this species are thick and glossy and are retained until late in the fall. The flowers are white with a tinge of red. The scarlet fruit is edible.

6 feet transplanted . . .	2.50	17.50	
5 " " . . .	1.75	10.00	60.00
4 " " . . .	1.00	6.00	40.00
3 " "75	5.00	35.00

Crataegus Oxycantha. HAWTHORN.

A dense-growing tree with thorny branches.
The flowers are pure white and appear in
May.

	Each	Per 10	Per 100
6 feet transplanted . . .	2.50	17.50	
5 " " . . .	1.75	10.00	60.00

Fraxinus Americana. WHITE ASH.

A very desirable shade tree for the street or
lawn. The leaves are smooth and glossy
and the trunk straight.

	Each	Per 10	Per 100
4 inch diam. transplanted . . .	4.50	35.00	
3½ " " " . . .	3.50	30.00

11

	Each	Per 10	Per 100
--	------	--------	---------

Gleditsia triacanthos. HONEY LOCUST.

The foliage of this tree is delicate and very ornamental. It is of great value where only a small amount of shade is desired.

4 inch diam. transplanted . . .	9.00	75.00	
3 1/2 " " " . . .	7.00	60.00	
3 " " " . . .	4.50	42.50	375.00
2 1/2 " " " . . .	3.00	27.00	225.00
2 " " " . . .	2.25	20.00	150.00

Juglans nigra. BLACK WALNUT.

This is one of the largest trees of our native forests. It is slow in growth and when mature presents a very fine appearance.

10 feet transplanted . . .	2.50	22.50	
8 " " . . .	2.00	17.50	
6 " " . . .	1.50	12.50	100.00
5 " " . . .	1.00	8.50	60.00

Larix decidua. EUROPEAN LARCH.

A deciduous tree with needle-shaped leaves and small cones. It bears a very close resemblance to an Evergreen, but has the advantage of producing no shade during the cold winter months.

10 feet transplanted . . .	1.00	9.00	
8 " "75	6.00	
6 " "60	5.00	40.00
5 " "50	4.00	30.00

Morus alba var. *Tatarica*.

RUSSIAN MULBERRY.

A tree of medium height with smooth shining foliage. The fruit varies in color from pink to black.

6 feet transplanted . . .	1.25	9.00	75.00
5 " " . . .	1.00	6.50	40.00
4 " "60	4.00	25.00

var. *Tatarica pendula*.

TEAS' WEEPING MULBERRY.

A variation of the above grafted on a tall stem. With its slender shoots drooping to the ground it produces a very pleasing effect.

	Each	Per 10	Per 100
<i>Morus alba</i> var. <i>Tatarica pendula</i> (continued).			
5 year heads transplanted . . .	5.00		
3 " " " . . .	3.00		
2 " " " . . .	1.50		

Ostrya Virginica.

HOP-HORNBEAM or IRONWOOD.

A small tree with birch-like foliage. It thrives in shady places and is therefore useful in undergrowth planting.

2 feet transplanted50	3.50	22.50
1½ " "40	2.50	15.00

Persica purpurea.

PURPLE-LEAVED PEACH.

The foliage of this tree is of a deep blood-red color when young, turning later to green.

8 feet transplanted . . .	2.00	17.50	
6 " " . . .	1.50	12.50	100.00

Populus alba var. *Bolleana.*

BOLLEANA POPLAR.

A silver-leaved tree resembling the Lombardy Poplar in its habit of growth.

3 inch diam. transplanted . . .	4.25	35.00	
2½ " " " . . .	3.00	25.00	
2 " " " . . .	2.00	17.50	150.00

balsamifera. BALM OF GILEAD.

A tree with a luxuriant growth of large glossy leaves which it holds well into the autumn.

3 inch diam. transplanted . . .	2.00	15.00	125.00
2½ " " " . . .	1.50	9.00	75.00
2 " " " . . .	1.00	6.00	45.00

deltoides var. *Carolinensis.*

CAROLINA POPLAR.

A tree of rapid growth, very popular for street planting.

3 inch diam. transplanted . . .	2.00	15.00	125.00
2½ " " " . . .	1.50	9.00	75.00
2 " " " . . .	1.00	6.00	45.00

GLEN VIEW NURSERIES

13

Populus nigra var. Italica.

LOMBARDY POPLAR.

A tall slender tree of rapid growth resembling a church spire in form.

	Each	Per 10	Per 100
8 feet transplanted60	5.00	40.00
6 " "50	4.00	30.00
5 " "40	3.00	20.00

Prunus avium var. rosea pendula.

WEeping CHERRY.

A handsome shrub-like tree of drooping habit bearing beautiful pink blossoms.

8 feet 4-year heads transplanted . . .	3.50
--	------

padus. EUROPEAN BIRD CHERRY.

A medium-sized tree with a profusion of long spikes of very fragrant white flowers.

10 feet transplanted . . .	1.00	9.00	75.00
8 " "75	6.00	50.00
6 " "60	5.00	40.00

Pissardi. PURPLE-LEAVED PLUM.

One of the best of the purple-leaved trees. It retains its beautiful color throughout the summer and fall.

8 feet transplanted . . .	2.00	17.50	
6 " " . . .	1.50	12.50	100.00
5 " " . . .	1.00	8.50	60.00

pseudo-cerasus.

JAPANESE FLOWERING CHERRY.

An attractive tree with large rose-colored flowers.

7 feet transplanted . . .	2.50
---------------------------	------

serotina. WILD BLACK CHERRY.

This species is the common native Wild Cherry. It bears clusters of shining black fruit and the leaves are tinted in the fall.

10 feet transplanted . . .	1.00	9.00	75.00
8 " "75	6.00	50.00
6 " "60	5.00	40.00

	Each	Per 10	Per 100
<i>Virginiana.</i> CHOKE CHERRY.			
This variety blooms a week earlier than the European Bird Cherry, which it resembles very closely.			
10 feet transplanted . . .	1.00	9.00	75.00
8 " "75	6.00	50.00
6 " "60	5.00	40.00

Pyrus aucuparia.

EUROPEAN MOUNTAIN ASH.

A very decorative tree with fine foliage and pyramidal shape. During the latter part of the summer it is laden with orange-colored berries.

3 inch diam. transplanted . . .	4.25	35.00	
2½ " " " . . .	3.00	25.00	
2 " " " . . .	2.00	17.50	150.00

var. quercifolia.

OAK-LEAVED MOUNTAIN ASH.

A variety similar to the above with leaves resembling those of the Oak.

3 inch diam. transplanted . . .	4.25	35.00	
2½ " " " . . .	3.00	25.00	
2 " " " . . .	2.00	17.50	150.00

Ioensis var. Bechtel.

DOUBLE FLOWERING CRAB APPLE.

A graceful tree, nearly covered in early spring with large delicate pink flowers, each blossom resembling a rose.

9 feet transplanted . . .	8.00		
7 " " . . .	5.00		
5 " " . . .	2.50		

Quercus bicolor. SWAMP WHITE OAK.

A tall symmetrical tree with shining dark green leaves.

8 feet transplanted . . .	2.00	17.50	
6 " " . . .	1.50	12.50	100.00
5 " " . . .	1.00	8.50	60.00

palustris. PIN OAK.

A tree of handsome appearance with deeply indented leaves.

CAPTAIN HAYWARD.

A free-flowering variety with bright crimson blossoms of large size.

DUKE OF EDINBURGH.

A seedling of General Jacqueminot, with bright crimson blossoms of large size.

FISHER HOLMES.

A moderately full Rose of a deep glowing crimson color and a fine imbricated form.

GENERAL JACQUEMINOT.

A very hardy Rose with fragrant crimson blossoms, not full but large and effective.

JOHN HOPPER.

A large full bright Rose with a carmine center.

MAGNA CHARTA.

A full globular fragrant Rose of a pink color suffused with carmine.

MARGARET DICKSON.

A variety with fine dark green foliage and blossoms of magnificent form and white color tinted with pink in the center.

MARSHALL P. WILDER.

An excellent long-blooming Rose with well-formed fragrant blossoms of a cherry-carmine hue.

MRS. JOHN LAING.

A valuable variety for forcing, with very fragrant finely formed soft pink blossoms of large size.

MRS. CRAWFORD.

A vigorous free-flowering Rose with deep rosy-pink blossoms, the outer petals shaded with pale flesh and white at the base.

PAUL NEYRON.

A variety desirable as a garden Rose. The flowers are a deep shade of pink and are very plentiful.

ULRICH BRUNNER.

A very effective Rose of brilliant cherry-red color. The blossoms are finely formed and are carried well upon the plant.

RUGOSA ROSES. See Shrubs.

EVERGREENS

PEARS.			
6 feet, strong	4.00	35.00	
5 " "	1.25	10.00	
BARTLETT.			
A standard Pear of large size and yellow color tinged with red. The pulp is very rich and juicy.			
CLAPP'S FAVORITE.			
A large and very juicy variety of yellow color with a red cheek.			
FLEMISH BEAUTY.			
A large Pear of remarkable sweetness.			
KIEFFER.			
A bright yellow and red Pear with a rich quince-like flavor. Fine trees of this variety with 3-inch trunks may also be had at \$4.00 each or \$25.00 per ten.			
SECKEL.			
A very popular small brown Pear with a red cheek. The flesh is sweet and juicy and the flavor exceptionally fine.			
5 feet strong	1.25	10.00	

SMALL FRUITS

	Each	Per 10	Per 100
BLACKBERRIES			
		1.50	
RATHBURN.			
An extra-large berry of good quality and jet black color. The bush suckers very little.			
SNYDER.			
A medium-sized berry of very sweet flavor.			
WILSON JUNIOR.			
An early-bearing variety with large luscious fruit.			

	Each	Per 10	Per 100
CURRENTS		2.50	

CHERRY.

The largest of all the red Currants. The berries are rather tart and the clusters short.

FAY'S PROLIFIC.

A red variety with longer clusters and less acid flavor than the above.

RED DUTCH.

A prolific bearer. The fruit is small and of good quality.

WHITE GRAPE.

An excellent table variety with large sweet or mildly acid fruit.

GOOSEBERRIES	3.50
--------------	------

DOWNING.

The largest of our native Gooseberries. The fruit is pale green and very sweet.

INDUSTRY.

An English variety bearing very large dark-red fruit of the best quality.

RED JACKET.

This variety is mildew-proof and very prolific. The fruit is smooth, bright red in color and of excellent quality.

GRAPES.

2 year plants, strong	3.50
-----------------------	------

BRIGHTON.

A Grape with thin dark-red skin and tender pulp of the best quality. It must be grown with other varieties, as it does not pollinize itself.

CONCORD.

One of the best known and most reliable varieties under cultivation.

NIAGARA.

A semi-transparent Grape with a thin tough skin of light green color, slightly ambered in the sun. The pulp is rich-flavored and sweet to the center.

GRAPES (continued).

POCKLINGTON.

A prolific variety with large juicy light-green fruit. It is considered equal to the Concord in flavor.

WORDEN.

A very large thin-skinned black Grape which ripens five to ten days earlier than the Concord.

RASPBERRIES 1.50

BLACK KANSAS.

This is the best black-capped Raspberry. The fruit is large, firm and of a fine jet black color. The flavor is unsurpassed.

COLUMBIAN.

A vigorous productive Raspberry with large red fruit of good quality. The plant propagates from the tip.

CUTHBERT.

A variety with large firm dark-crimson berries of excellent flavor.

LOUDON.

A variety similar to the Cuthbert but hardier and later in bearing.
